

Uniting national vision and local action against antimicrobial resistance

Each year, antimicrobial resistance (AMR) takes the lives of thousands of Canadians, affecting people we know, love, and care for. Winning the fight against AMR requires a unified national effort, one that integrates the Canadian Antibiotic Treatment Guidance, developed by AMMI Canada through a rigorous, evidence-based process, into daily medical practice. **As a healthcare professional, your leadership plays a critical role.**

Meet Firstline: A smarter way to take action on AMR

Firstline empowers providers to simplify treatment decisions by providing fast access to antibiotic treatment guidance and antimicrobial dosing information at the point of care.

- » Make better decisions to deliver better patient outcomes
- » Reduce the burden of drug-resistant infections in our communities
- » Minimize adverse events and long-term complications associated with unnecessary antibiotic use
- » Access antimicrobial stewardship tools and resources

Get started with Firstline in less than 60 seconds

1. Download on mobile or access on the web
2. Click 'Select Location' and choose **Canadian Antibiotic Treatment Guidance**
3. Instantly access guidance tailored to the Canadian context to optimize patient outcomes and combat the spread of AMR
