Daily new confirmed COVID-19 cases per million people

Shown is the rolling 7-day average. The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing.

Daily new confirmed COVID-19 deaths per million people

Shown is the rolling 7-day average. Limited testing and challenges in the attribution of the cause of death means that the number of confirmed deaths may not be an accurate count of the true number of deaths from COVID-19.

Summary

- The case rate in Windsor-Essex County continues to decline
- Acquisition source is distributed between household contacts, close contacts and outbreaks indicated widespread community transmission.
- COVID-19 related hospitalizations continue to decrease
- The number of active outbreaks in the region is also declining.
- Day-over-day doubling time in Windsor-Essex is better than Ontario and Canada.

Summary of Monitoring Indicators for WEC

- Weekly case rate = 46.1 cases/**100,000 population**
- Percent positivity = 2.6%
- R_o (effective) = 0.76
- *Criteria for Red (Control)*
 - Weekly case rate of 40 or more/100,000 population
 - Percent positivity of 2.5 or more
 - R_o (effective) of 1.2 or more
