

Table 1. Assessment of Influenza activity in Windsor-Essex County for Week 19

Measure of activity	Assessment compared to previous week (Lower, Similar, Higher)	Reasoning behind assessment
Laboratory-confirmed influenza cases	Lower	No laboratory-confirmed influenza cases reported
Influenza outbreaks	Lower	No new influenza outbreaks reported in Week 19
Influenza activity levels	Lower	No ongoing Influenza outbreak as of May 13 th
ILI & Respiratory ED Visits	Similar	4.3% decrease in ILI & Resp. Syndrome visits from last week
OVERALL ASSESSMENT	Lower	

Table 2. Number of laboratory confirmed influenza cases reported in Windsor-Essex County: Week 19 & 2016-17*

Windsor-Essex County	Influenza A n (avg)	Influenza B n (avg)	ALL TYPES n (avg)
Week 19	0 (0)	0 (1)	0 (2)
SEASON-TO-DATE*	146 (122)	18 (51)	164 (173)

*Average of past-five seasons (2011-12 to 2015-16) reported in brackets

Table 3. Respiratory infection outbreaks in institutions: Week 19 and Total for the 2016-2017 Influenza season

Aetiologic Agent/Organism	Week 19 outbreak count (%)	2016-2017 season outbreak total (%)*
Influenza A [†]	0	18 (38.3%)
Influenza B	0	1 (2.1%)
Influenza A and B	0	0
Enterovirus/rhinovirus	0	3 (6.4%)
Parainfluenza (all types)	0	2 (4.3%)
Respiratory syncytial virus (RSV)	0	7 (14.9%)
Combined outbreaks (more than one non-influenza organism)	0	4 (8.5%)
Other organisms (i.e. metapneumovirus, adenovirus, and coronavirus)	0	11 (23.4%)
No organism identified	0	1 (2.1%)
TOTAL	0	47

*Cumulative total only includes outbreaks with an index case onset date on or after Week 36. There was one outbreak of enterovirus/rhinovirus with an index case onset date in Week 35 that was declared over in Week 40. This outbreak was not included in the season total.

[†]Includes combined outbreaks of Influenza and other microorganisms
