

**Table 1. Assessment of Influenza activity in Windsor-Essex County for Week 45**

Measure of activity	Assessment compared to previous week (Lower, Similar, Higher)	Reasoning behind assessment
Laboratory-confirmed influenza cases	Higher	One sporadic laboratory-confirmed influenza case reported
Influenza outbreaks	Higher	One new influenza outbreak reported in Week 45
Influenza activity levels	Higher	One ongoing Influenza outbreak as of Nov 15 <sup>th</sup>
ILI & Respiratory ED Visits	Similar	6% of all ED visits in Week 45 were due to ILI & Resp. syndrome. This is a 10% decrease from the previous week.
<b>OVERALL ASSESSMENT</b>	Higher	

**Table 2. Number of laboratory confirmed influenza cases reported in Windsor-Essex County: Week 45 & 2017-18 season<sup>†</sup>**

Windsor-Essex County	Influenza A n (avg)	Influenza B n (avg)	ALL TYPES n (avg)
Week 45	0 (0)	1 (0)	1 (0)
<b>SEASON-TO-DATE*</b>	<b>0 (1)</b>	<b>1 (0)</b>	<b>1 (1)</b>

<sup>†</sup>Average of past-five seasons (2012-13 to 2016-17) reported in brackets

**Table 3. Respiratory infection outbreaks in institutions: Week 45 and Total for the 2017-18 Influenza season**

Aetiologic Agent/Organism	Week 45 outbreak count (%)	2017-18 season outbreak total (%) <sup>*</sup>
Influenza A <sup>†</sup>	1 (50%)	1 (11%)
Parainfluenza (all types)	0	1 (11%)
No organism identified/Unspecified	1 (50%)	7 (78%)
<b>TOTAL</b>	<b>2 (100%)</b>	<b>9 (100%)</b>

<sup>†</sup>Includes combined outbreaks of Influenza and other microorganisms
